Technical Skill

Software Development

- HTML5
- Tailwind
- CSS
- Bootstrap
- Laravel(PHP)
- React
- Node.js
- MongoDB
- MySQL
- Vercel
- Render
- Git/Github
- Figma

AI - Assisted Production

- Gemini
- Claude
- Deepseek

IT & Networking

- Hardware Maintenance
- Network Cabling (CAT6)
- IP Configuration

I build smart, scalable web systems that turn slow, manual tasks into fast, automated workflows. With expertise in the MERN stack and Laravel, I use AI tools to write clean code and launch projects in record time. From secure payment systems to high-performance networks, I focus on creating technology that just works.

Education

Araullo University

Bachelor of Science in Information Technology (2022 - 2026)

Work Experience

DICT-CAR | IT Intern

Dec 2025 - Mar 2026

- Engineered a centralized GovNet monitoring tool and an automated event tracker to eliminate manual Google Sheet workflows and streamline participant oversight.
- Managed agency-wide network configurations and IP-based CCTV deployments, ensuring 24/7 operational stability through high-level technical troubleshooting.

MIOYM Equities | Web Developer

Mar 2026 - Present

- Built a full-scale webinar management system with an automated posting tool and admin dashboard. Reduced development time by leveraging AI-assisted tools, delivering a high-quality, production-ready site ahead of schedule.

Projects

Lelo's Resort: Reservation and Management System

Laravel, Bootstrap, MySQL, PHP

- Automated manual booking workflows and integrated PayMongo API to reduce administrative workload and enable secure online payments.
- Designed a responsive UI using Bootstrap to ensure a seamless and optimized booking experience across mobile and desktop devices.

Capture The Flag (CTF) System

Laravel, Bootstrap, MySQL, PHP

- Engineered a secure platform with Role-Based Access Control (RBAC) and a full CRUD Admin Dashboard for real-time management of challenges and users.
- Developed an interactive interface featuring real-time scoreboards and automated flag submission tracking to enhance user engagement.
